Answer Engine Insights

Understand how AI is talking about your brand.

9 FEATURES

FEATURE	WHAT IT DOES	STATUS
AUTHORITY		
Visibility, Citations, Sentiment	Core AEI tracking across ChatGPT, Perplexity, Google AI Overviews, Claude, Microsoft Copilot, and more.	• Live
Sentiment v2	Thematic clustering of sentiment attributes and the citations driving negative sentiment.	• Beta
FactCheck	Measure how accurately AI represents your brand and surface inaccurate claims with their sources.	• Beta
COVERAGE & TRACKING		
Query Fanout	Explore the web search queries LLMs run for a given user prompt.	• Live
Microsoft Copilot Query Fanouts	Access query fanouts specifically from Microsoft Copilot.	• Live
Claude Code tracking	Track prompts and responses across Claude Code.	• Live
Qwen tracking	Visibility into Qwen, one of the only AI models operating in China.	• Live
Asset Hierarchy	Break reporting into structured parent-child components so high-performing assets do not mask underperforming ones.	• Live
Chart Annotations	Annotate charts to see which actions or events drove changes in scores.	• Coming H1 2026

Prompt Volumes

Discover what millions of people ask AI.

6 FEATURES

FEATURE	WHAT IT DOES	STATUS
Intent Tagging	Track intent breakdowns for each keyword (commercial, informational, etc.).	• Live
Prompt Citations	View the prompts that drove citations to a specific page.	• Live
Prompt Research Reports	Direct access to prompt insights from Profound's dataset of 1.5B real user prompts, organized by topic, ranked by share, tagged by intent.	• Live
Brand Relevant Prompts	Surface the prompts where AI cited your brand or your competitors, and see who appears alongside you.	• Live
Top Prompt Clusters	Most commonly asked prompt categories for a given keyword.	• Live
Prompt Recommendations	Discover missing topics and prompts you aren't tracking yet.	• Coming H1 2026

Agent Analytics

AI citations → human referrals → real revenue.

12 FEATURES

FEATURE	WHAT IT DOES	STATUS
MCP & Python SDK	Access the external API via MCP or a custom Python SDK.	• Live
Claude Code & Clawbot tracking	Understand when AI Agents like Claude and Clawbot are citing your domains.	• Live
Page Tags	Tag pages by exact path or subpath, filter analytics, manage your tag library.	• Live
Shopify integration	First-party Agent Analytics for Shopify brands, previously impossible due to Shopify's server architecture.	• Live
Google Suite integrations	Docs, Slides, Sheets, Search Console, Looker, Gmail.	• Live
Adobe Analytics integration	Connect Profound to Adobe Analytics for a complete picture of how AI Agents interact with your site.	• Beta
CDN integrations	Support for Shopify, Google Cloud, WordPress, and others.	• Ongoing
AEO Site Audit	Audit your site for AEO performance and automate improvements.	• Coming H1 2026
Page Performance	Combine AEI and Agent Analytics on top of your pages to track performance over time.	• Coming H1 2026
Benchmarking	See how your brand and content perform relative to industry benchmarks.	• Coming H1 2026
Microsoft Suite integrations	Word, Excel, PowerPoint, Outlook, Teams.	• Coming H1 2026
Adobe Suite integrations	Adobe Experience Manager, Adobe Analytics.	• Coming H1 2026

Shopping Analysis

Understand how AI is recommending your products.

4 FEATURES

FEATURE	WHAT IT DOES	STATUS
Shopping v2	Track products in AI shopping results, see merchant share and competitive positioning.	• Live
Buying Factors	Understand the attributes and factors AI uses when recommending products in your category.	• Coming H1 2026
Buying Journeys	See how products show up across top, middle, and bottom of the shopping journey.	• Coming H1 2026
Product Feed integrations	Integrate product catalogs and feeds for automated AI visibility recommendations.	• Coming H1 2026

Agents

Build custom marketing automations.

19 FEATURES

FEATURE	WHAT IT DOES	STATUS
Agent Builder	Visual builder for custom marketing automations across Profound, the web, and your stack.	● Live
Profound Data Nodes	Pull AEI, Prompt Volumes, citations, and other Profound data directly into Agents.	● Live
Prompt Volumes Data Nodes	Query Prompt Volumes data inside Agents for keyword prioritization and forecasting.	● Live
Agent Assistant	Create Agents using natural language instead of manual configuration.	● Live
Agents API	Run existing Profound Agents programmatically from any external tool.	● Live
Iteration Node	Scale Agents to run across multiple inputs in parallel.	● Live
Conditional Node	Branch Agent outcomes based on criteria.	● Live
Generate Code with AI	Use natural language and LLMs to write code for Code nodes.	● Live
Pre-built Agent Templates	Article Translator, YouTube Metadata Optimizer, PDP FAQ Generator, Content Brief Creator, AEO & SEO Research Report, and more.	● Live
Slack Node	Send alerts, notify teams, route drafts for review.	● Live
CMS Nodes	WordPress, Sanity, Webflow, Payload.	● Live
Framer Node	Generate landing pages in Framer guided by AEO data.	● Live
Gamma Nodes	Generate presentations, documents, and webpages in Gamma.	● Live
Google Search Node	AI Overviews, Knowledge Graphs, People Also Ask, Related Searches, organic results, location targeting.	● Live
Semrush Nodes	Domain metrics, backlinks, keyword research, organic search, top pages.	● Live
Exa AI Nodes	Search, Contents, Find Similar Links, Answer.	● Live
Human-in-the-loop Node	Integrate human review and approval directly into workflows.	● Coming H1 2026
Image Generation	Generate imagery and fetch from stock libraries.	● Coming H1 2026
Error Handling	Route failures into dedicated branches, configure default outputs, skip on errors.	● Coming H1 2026

Sheets

Run and deploy Agents at scale.

7 FEATURES

FEATURE	WHAT IT DOES	STATUS
Sheets	Spreadsheet interface for running hundreds of Agents in parallel with editable inputs.	• Live
Live Collaboration	Edit, update, and run Agents on data tables with teammates simultaneously.	• Live
Sheets Imports	Import directly from Google Sheets, Google Search Console, Looker, Semrush, and Firecrawl.	• Live
Sheets Node	Feed Sheets data back into Agents.	• Live
Bulk Execution	Scale Sheets to thousands of rows for high-volume automations.	• Coming H1 2026
Google Sheets Sync	Two-way sync between Profound Sheets and Google Sheets.	• Coming H1 2026
CMS Import / Export	Pull content from your CMS into Sheets and push processed data back.	• Coming H1 2026

Opportunities

Actionable insights from your data.

4 FEATURES

FEATURE	WHAT IT DOES	STATUS
Opportunities v1	Discover the highest-impact opportunities to act on.	• Live
Insights → Opportunities	Turn performance insights into intelligent content changes.	• Coming H1 2026
Project & Task Management	Organize, assign, and track opportunities.	• Coming H1 2026
Automated Actions w/ Agents	Take immediate action on opportunities with pre-built Agents.	• Coming H1 2026

Content

Create, manage, and optimize all of your pages.

4 FEATURES

FEATURE	WHAT IT DOES	STATUS
Content Creation & Optimization	Generate and optimize blog posts, product listings, social posts for AEO.	• Live
Content Management	Manage, edit, and monitor all content across Profound and your CMS in one place.	• Coming H1 2026
Content Analytics	Understand how content changes impact page-level performance over time.	• Coming H1 2026
Automatic Content Refresh	Keep content accurate with pre-built refresh Agents.	• Coming H1 2026

Background Agents

Always-on intelligent action layer.

1 FEATURE

FEATURE	WHAT IT DOES	STATUS
Alerts	Monitor and respond to critical updates across tracked assets and segments, including visibility shifts, competitor moves, content spikes, and sentiment changes.	• Coming H1 2026

ChatGPT Ads

Optimize ad campaigns on ChatGPT.

3 FEATURES

FEATURE	WHAT IT DOES	STATUS
Prompt Planning™	Use AEI and Prompt Volumes to inform the prompts you should be bidding on.	• Coming H1 2026
Prompt / Ad Landing Pages	Use Profound Agents to create landing pages hyper-optimized for relevance and conversion.	• Coming H1 2026
Agent Analytics for Ads	Citation and traffic trends for ad landing pages, powering A/B testing and ROI calculations.	• Coming H1 2026

Platform

Cross-cutting capabilities used across every product.

7 FEATURES

FEATURE	WHAT IT DOES	STATUS
Ask Profound	Conversational interface that turns AEO data into instant answers, with charts rendered alongside.	• Live
Custom Dashboards	Configurable, shareable views of Profound data; private by default with controlled sharing.	• Live
Knowledge Base	Connect proprietary docs from Notion, Google Drive, or sitemaps so Agents and FactCheck use your source of truth; auto-sync on a schedule.	• Live
Name Matcher	Group thousands of fragmented or misspelled brand and competitor mentions into a single accurate metric.	• Live
Multi-brand Asset Management	Manage multiple brands as Assets with cleaner organization and visibility metrics at a glance.	• Live
Prompt Management via API	Create, update, and change prompt status programmatically.	• Live
Profound University	On-demand AEO courses, cohort-based Pods, and AEO Certifications.	• Live

FORWARD-LOOKING STATEMENT

Items marked Beta, Coming, or Ongoing reflect Profound's current product roadmap and are subject to change. Timing, scope, and availability of unreleased features may shift based on engineering priorities, customer feedback, and market conditions. Roadmap items should not be relied upon when making purchasing decisions; reach out to your account team for the latest status.
